

TESTs – Lesson 1 – Introduction EVM

What is the primary role of a Metamask wallet in the Ethereum network?

- ☐ A To securely store your email and personal information.
- ☒ B To serve as your identity and control your digital assets.
- ☐ C To directly store physical cryptocurrency coins.
- ☐ D To mine new Ethereum tokens.

When creating a Metamask wallet, why is it that you don't need to provide personal information like your name or email?

- ☐ A The system uses your IP address for identification instead.
- ☐ B Your wallet is linked to your existing bank account for verification.
- ☒ C The wallet generates a random public-private key pair, not requiring personal details.
- ☐ D Metamask is a centralized service that already knows your identity.

What is the main purpose of using a 'faucet' to obtain tokens on a Sepolia testnet?

- ☐ A To acquire real cryptocurrency for investment purposes.
- ☒ B To test smart contracts and transactions without using real money.
- ☐ C To gain access to exclusive decentralized applications.

When you initiate a transaction on the Ethereum blockchain, what is the immediate status before it is officially confirmed?

- ☐ A Executed
- ☐ B Finalized
- ☒ C Pending
- ☐ D Reverted
